

#### INTEGRATED SUPPLEMENTARY FIGURE TEMPLATE

Supplementary figures and legends are neither edited nor styled by the journal, so authors are requested to follow the same style guidelines provided for figures in the main article, including use of official gene symbols, italics, superscripts, subscripts and symbols. Titles for Supplementary Figures should be a single sentence and should not contain subpanel descriptions, reference citations or abbreviations that are not defined in the main text. The number of Supplementary Figures should not exceed the number of main-text Figures. Cell borders will be removed by the production team when the file is final.

Click inside this box and insert image for Supplementary Figure 1. For best results, use Insert menu to select a saved file; do not paste images. Source images must be JPEGs (no larger than 10 MB) saved in RGB color profile, at a resolution of 150–300 dpi. Optimize panel arrangement to a 2:3 height-to-width ratio; maximum online display is 600h x 900w pixels. Reduce empty space between panels and around image. Keep each image to a single page.

Delete these instructions before inserting the image.

#### Supplementary Figure 1

Insert figure title here by deleting or overwriting this text; keep title to a single sentence.

Insert figure caption here by deleting or overwriting this text; captions may run to a second page if necessary. If you need to cite a reference, do not include a reference list at the end of this document. Instead, add the reference information to the end of the legend. You may include a separate reference list at the end of the PDF of supplementary information.

To ensure accurate appearance in the published version, please use the Symbol font for all symbols and Greek letters.

Click inside this box and insert image for Supplementary Figure 2. For best results, use Insert menu to select a saved file; do not paste images. Source images must be JPEGs (no larger than 10 MB) saved in RGB color profile, at a resolution of 150–300 dpi. Optimize panel arrangement to a 2:3 height-to-width ratio; maximum online display is 600h x 900w pixels. Reduce empty space between panels and around image. Keep each image to a single page.
