

# Supplementary Information Titles

*Please list each supplementary item and its title or caption, in the order shown below.  
Upload this Word document as a related manuscript file.*

- **We do NOT copy edit or otherwise change supplementary information, and minor (nonfactual) errors in these documents cannot be corrected after publication.** Please submit document(s) exactly as you want them to appear, with all text, images, legends and references in the desired order, and check carefully for errors. Ensure the terminology conforms with the main text
- Number each Supplementary Figure, Table and Video **in the order they are called out in the main text**. Do not number other supplementary items unless there is more than one and with the editor's approval.
- For video legends: please provide a brief title and continue with a short description.
- Individually list each supplementary item and its descriptive title in the table below. Titles for multipart figures or tables must refer to the figure or table as a whole, not to individual panels, and must match the title in the legend.
- Supplementary Methods are not permitted except for methods used solely to acquire supplementary data or for article types that do not have Online Methods.
- Combine the separate Supplementary Figures, Tables and text files (such as Methods and Note) into a single PDF file that is ready to be posted on our website. List the title and authors of your paper at the top of the first page. (Note: Large Supplementary Tables that are more appropriate as Excel spreadsheets should be omitted from the combined PDF. Please consult with the editor.)
- If you are including source data for main text figures, please list the files in the bottom table.

<b>Journal:</b> Nature Methods	
<b>Article Title:</b>	
<b>Corresponding Author:</b>	

<b>Supplementary Item</b> (add rows as necessary)	<b>Title or Caption</b>
Supplementary Figure 1	[TITLE OF FIGURE (descriptive title used in legend)]
